PROPOSAL WEB APP

Introduction

Name: YouTravel

Our web application is going to be a travelling website, giving to the clients everything they need to prepare the perfect trip. For now, our website will be dedicated to Europe. The information will be divided by cities and by environments (beach/mountain/ natural parks/ etc...)

There will be two parts: a public part that any visitors will be able to access and a private part of which the access will only be given to registered users. We will also present the possible improvements we could apply later on .

Public part

First of all, on all our pages, there will be a header, a vertical menu and a login area. The menu buttons will be the following: Home, Destinations Top 10, More (that will be useful when we want to add on to our menu), FAQ, Contact us, About and Help.

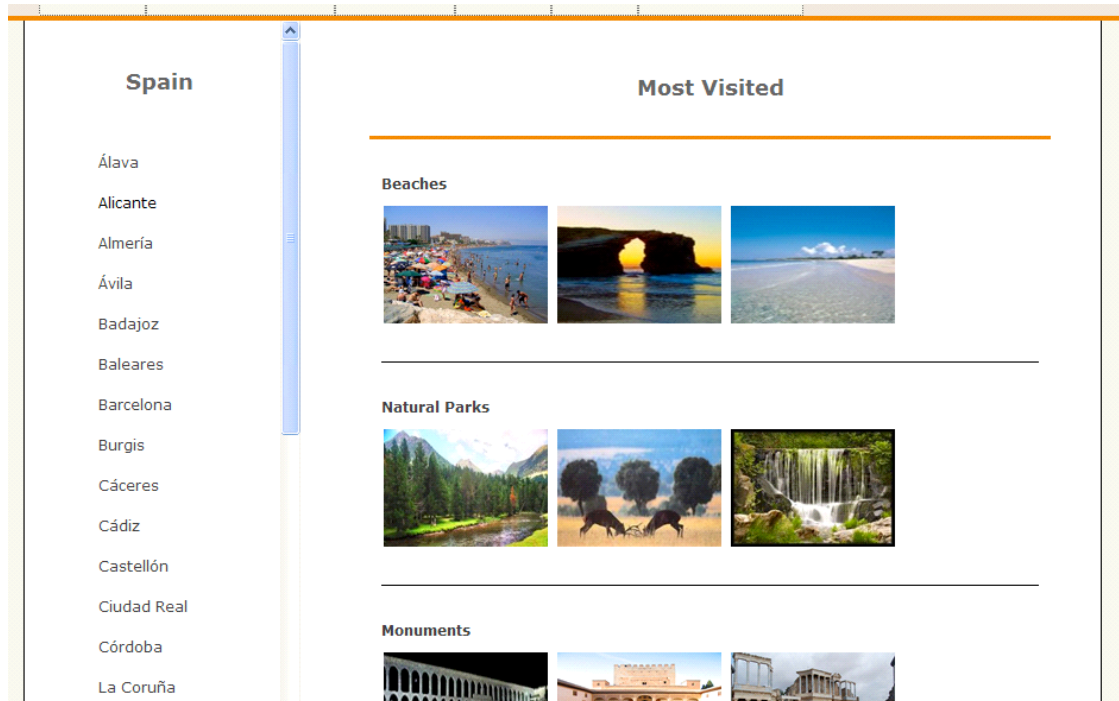

Users will first arrive on our home page that will contain our latest news and also, on the side, a list of the 10 newest places added to the website.

Then, any user will be able to search a city (by clicking on “Destinations” in the menu). We will then offer them a list of countries in Europe.

After selecting a country, the user can either pick a city from a given list on the left or pick the environment he is interested in (beaches, natural parks, monuments)

On a city page, we will have the following information: 5 best things to do, 5 best restaurants, 5 best hotels along with some useful information (printable map: city map, bus map, train map, etc...). The user can either click on what he is interested in, or click on “More...” to see more of each category.

In the menu, we will also have a “Top 10” cities in Europe.

TOP 10 Places in Europe

1

Paris, France

Paris is the capital and largest city of France. It is situated on the river Seine, in northern France, at the heart of the Île-de-France region (or Paris Region, French: Région parisienne). The city of Paris, within its administrative limits (the 20 arrondissements) largely unchanged since 1860, has an estimated population of 2,211,297 (January 2008), but the Paris metropolitan area has a population of 12,089,098[4] (January 2008), and is one of the most populated metropolitan areas in Europe.[5] Paris was the largest city in the Western world for about 1,000 years, prior to the 19th century, and the largest in the entire world between the 16th and 19th centuries.

Registrate User Main Page

This is your private space.

Once a user is registered, he will have a profile page where all his information will be stored. He will be able to access it and also modify it as he wishes.

Once a user has logged in, some services will be offered:

- A client will be able to create routes for each of his trips and we will offer all the information they need with a faster access than if they needed to check each page of each city themselves like a non-registered user.

- A client will be able to mark a page as a favorite and then access a page with all of his favorite pages.

Possible improvements

- Website in three languages: English, Spanish and French.
- Improve the design.
